

Feedback from Past Immersion Students (anonymous surveys)

What were some of the most positive aspects of your whole immersion experience?

All immersion teachers were always very dedicated to using high quality material for our courses, which made the whole experience very enjoyable and beneficial to our studies. Apart from that, the time we spent in England was an obvious highlight

It was great to recognise the overall achievements in English. I would never have imagined being able to write the Matura Paper in English.

The possibility to improve my speaking skills and the fact that the subjects were much more interesting when taught in English.

Using the language and not just learning it.

My English language skills improved immensely, and being in a class full of students who enjoy the English language as much as I do played a big role in this improvement. I now can not only speak quite fluently in English, but also and most importantly feel comfortable and confident enough to approach new topics and subjects in English such as economics or science.

Were there any negative points?

The workload at the beginning was quite challenging because everything was so new but this improved with time to the point that it wasn't an issue any more.

Were your own language expectations met?

I feel very comfortable with the English language not only in written but also in spoken language. Furthermore, I have the CAE and I am preparing for the Proficiency. In my opinion, there is nothing more that could be achieved.

Yes, I am now able to have conversations in English without making too many mistakes any more. That is, my fluency has improved a lot and this was my goal.

Would you choose to do immersion again if you had the choice?

Yes! I benefited a lot from speaking so much English and reading so many English texts. Now I feel very comfortable in having chats in English with anyone.

Yes, it was a great experience.

I would definitely choose to do Immersion again. It's the best choice I could have made. It is so easy to improve your English; you learn so much without too much effort. The only thing you have to do is listen to the teacher and get used to it in the beginning. It could not be easier to learn English.

Do you have any specific plans to use your English knowledge in the future?

I'm already sure that I'm going to have a job in which communicating with people will play an important role. Therefore, I will have to use my language skills.

I have already used it in my exchange semester and received many compliments for my English knowledge from native speakers. I intend to use my knowledge as much as I can in order to keep the English skills I have now, such as in studies or even living abroad etc.

I will study Mathematics at the ETH and I'm glad my Maths lessons were in English because the Masters will be in English too and maybe I will have the chance to work abroad after my studies.
